

My name is Sharona Merlin, a 35 years old, freelance product & graphic designer, graduated from Shenkar collage of design and engineering. I was born on june 9th 1983, which means I'm a gemini. I don't know much about astrology but according to the stars, "Gemini is adaptable, dexterous and can maneuver many things at once." And thus, I'm a mix of many things; I'm half moroccan and half polish. my mom is an interior designer, my dad was a computer and business man. My mom has 11 brothers and sisters; my dad had only one sibling. And as for me, I'm a dancer, a ski instructor, a designer and everything that is between. I try to do everything I can to increase my knowledge and experiences and use these in my designs. I am ambitious, hard working, a quick learner and posses excellent understanding skills (especially in computers)
